# Introduction to ControlCase

## CERTIFICATION AND CONTINUOUS COMPLIANCE SERVICES

Go beyond the auditor's checklist to:

Dramatically cut the time, cost, and burden from becoming certified and maintaining IT compliance.

- Demonstrate compliance more efficiently and cost effectively (cost certainty)
- Improve efficiencies
  - Do more with less resources and gain compliance peace of mind
- Free up your internal resources to focus on their priorities
- Offload much of the compliance burden to a trusted compliance partner

# WHAT IS HITRUST?

# What is HITRUST?

Founded in 2007 to help companies safeguard sensitive data and manage risk.

Established a certifiable framework for organizations that create, access, store, or exchange covered or sensitive information.

Originated from the belief that information security is critical to the widespread utilization of and confidence in health information systems, medical technologies, and electronic exchanges of medical data. Now, the HITRUST CSF is industry agnostic.

# What is the HITRUST CSF?

## HITRUST CSF

The HITRUST CSF Framework (CSF) rationalizes and harmonizes relevant data protection regulations and standards into a single overarching security and privacy framework. The HITRUST CSF:

- Allows organizations the ability to tailor their security control baselines based on their specific information security requirements.
- Incorporates both compliance and risk management principles.
- Defines a process to effectively and efficiently evaluate compliance and security risk.
- Supports HITRUST Certification.

# Key components of the CSF assurance program

## Standardized Tools & Processes

### Questionnaire

- Focus assurance dollars to efficiently assess risk exposure
- Measured approach based on risk and compliance
- Ability to escalate assurance level based on risk

### Report

- Output that is consistently interpreted across the industry

## Rigorous Assurance

- Multiple assurance options based on risk
- Quality control processes to ensure consistent quality and output across HITRUST External Assessors
- Streamlined and measurable process within the HITRUST MyCSF tool
- End User support
